

# ADSI Distribute-IT Software Solution

Distribute-IT is a Warehouse Management System for the small-to-medium enterprise. This powerful solution enables growth and improved productivity by automating and enhancing the inventory control process. With Distribute-IT you can increase operating efficiencies, picking accuracy and fill rate, while reducing shrinkage and lost time.

## Key Financial Benefits

- Improved profitability, achieved through labor productivity gains in the warehouse operation.
- Improved working capital and operational liquidity, achieved through optimizing inventory levels.

## Get it right the first time

goods • quantity • place • time • price

- Reduced operating costs, achieved by reducing shipping errors and associated charge backs.
- Improved customer satisfaction levels, achieved by real-time order visibility and reduction in errors.

## Microsoft Based Technology

Distribute-IT is based on Microsoft technology including Windows-based PCs and servers, Microsoft SQL server as the database, and Windows Mobile and CE-based mobile devices. Distribute-IT supports numerous brands of mobile hardware.

Distribute-IT's real-time WMS functionality is easy-to-use and includes the following major functional areas:

- Picking, Packing and Shipping
- Location Management
- Barcoding
- Material Handling and Movement
- Inventory Management and Cycle Counting
- Waving/Batching

**Our Turn-Key Solutions Lead Businesses to Greater Profitability.**

# Distribution Solution for your Business

## Streamline Your Warehouse Operation with Distribute-IT

System Module	Feature
<b>Inbound Functionality</b>	
System / Facility Set Up	Rapid Implementation Methodology
	Multiple Locations for Inventory
	Complex SKU Set Up (multiple pack configs, etc)
	Inventory Licenses Plates / Unique Inventory Identifiers
	Inventory Lot Control
	Inventory Expiration Date Management
	Inventory Serialization
	Strict FIFO Control
	Advanced Facility Rules (Putaway paths, pick paths, drop controls)
	Cube Info / Interface to Cubiscan
Reporting	Base System Reporting - Predefined Reports, Export to Excel
	Advanced System Reporting - Dashboards, Productivity Reporting
ERP / Host Integration Available	ERP / Host Integration Available
	Stand Alone WMS Available
Location Management	Print Location Labels
	Basic Location Management
	Advanced Location Management
Receiving	PC Receiving
	Handheld / RF Receiving
	Quality Control Hold / Release
	Palletization
Putaway	Cross Docking
	Handheld / RF Directed Putaway
	Handheld / RF Non Directed Putaway
	Putaway Rules for Product Class and Zone
Inventory Management	Quality Control Rules
	Handheld / RF Move, Split/Combine Pallet
Physical Inventory	Inventory Creation and Consumption
	Handheld / RF Cycle Count Locations - Manual
	Handheld / RF Cycle Count Locations - System Directed
	Rules Based Auto Count for Inventory Shortage
<b>Outbound Functionality</b>	
Order Management and Planning	Manual Order Management by Priority
	Waving - Rules Based Order Grouping
	Batching - Rules Based Task/Pick Grouping
Handheld/RF Picking	Pallet Pick
	Case Pick
	Piece Pick
	Directed to Order Consolidation Area
	Batch Picking (Cube and Non Cube Based) to Pallet, Tote or Cart
	Pick and Stick
	Recommend Carton Size
	Min / Max Replenishment to Pick lanes from Bulk/Reserve
	Pallet Stripping
	Pick and Pack
Pick to Tote and Scan Pack	
Other Picking	Paper Picking
	Bulk Pull and Distribute
Integration to Picking Automation	Integration to Pick To Light Available
	Integration to Materials handling Equipment Available
	Integration to Carousel Available
	Integration To Conveyers and Inline Scales Available
	Integration to Packing Equipment Available
	Integration to WCS Available
