

ADSI Submit-IT Software Solution

Optimize your export shipping operations by adding ADSI's Submit-IT solution to your operations. Submit-IT is an automated solution to file Electronic Export Information (EEI) through the Automated Export System (AES).¹ Submit-IT works with ADSI's Ship-IT™ for a complete and automated export shipping solution.

Capture Classification Information

ADSI's project specialists work with you to capture classification information for your commodities (Harmonized Tariff Schedule (HTS) or schedule B, description, reporting unit of measure, reporting quantities, value, gross weight, origin, license number, ECCN). ADSI will work with you to map the required AES fields.

Automate the Shipping Process

Ship-IT is configured to allow you to scan your shipment number as the order moves through the shipping line. Commodity details are then populated into Submit-IT.

As the shipment is being processed with Ship-IT, the EEI details are automatically transmitted to AES.

¹ ADSI is AESWebLink Certified to comply with the mandatory electronic reporting of export information Public Law 107-228 published on June 2, 2008.

Automatically Print Shipping Documents

When export information has been successfully submitted and an ITN response is retrieved, shipping labels and export documents will immediately print. The Internal Transaction Number (ITN) is printed on the carrier compliant shipping label.

Shipment details including ITN number will be returned to your host system for record keeping.

AESDirect information is submitted

The screenshot shows a software window titled "AES Request General Information". It contains the following fields: "Transportation Ref:" (262799), "Foreign Trade Zone:", "Port Of Export:" (4192), "Port Of Unloading:", "Mode Of Transport:" (Air), "SCAC:" (FX), "Conveyance Name:" (FedEx International Economy), "Vessel Flag:", "Related Companies:" (checkbox), "Routed Transaction:" (checkbox), "Inbond Type:" (dropdown), and "Import Entry Number:". At the bottom, there is an "AESDirect" logo, a link to "AESDirect Login Help", and an "OK" button.

Benefits of Filing with Submit-IT

- **Ensure export compliance.** Submit-IT's editing system ensures compliance with current Census Bureau export reporting requirements. The system returns an Internal Transaction Number (ITN) as confirmation that you have successfully filed your export documentation.
- **Correct errors as they occur.** Submit-IT generates a response message to the filer when filing data is incomplete, omitted, or inconsistent. Submit-IT allows you to correct errors early in the process—before your goods are subject to delays or penalties.
- **Decrease your costs.** Eliminate the cost of corrections with up-front data edits. Save money by reporting your export information through free and secure internet applications with ADSI's Submit-IT for AESDirect.
